## General description.

A great portion of this fractional Township is wet Prairies, Ponds &c. all of which is poor land, unfit for cultivation. In many of them remnants of old Tamarack trees are yet to be found. Where two or more of these

T. 28 N., R. 3 E. 2.<sup>d</sup> Mer. Ind.<sup>a</sup>

wet Prairies are connected, banks or ridges are formed by the action of waves (2 or 3 feet high) coming in contact from each way. The floating substance is driven to this point until the bank is formed sufficiently high to separate the Lakes which were here formerly. We often find on the margin of the present Lakes a thick coat of grass, Flag, Rushes &c. which is evidently encroaching on the water. And from every appearance, the water is receding and giving place to this vegetable substance, and in time many of the present lakes will be wet Prairies, perhaps good farming land. A strip North of the old Indian Boundary is good rich tillable land, and will soon settle.

I hereby certify, that in pursuance of a contract with Micajah T. Williams, Surveyor General of the United States for the States of Ohio, Indiana and Michigan Territory, bearing date the 27.<sup>th</sup> day of December 1833, and in strict conformity to the Laws of the United States and the Instructions of said Surveyor General, I have surveyed and subdivided into sections fractional Township N.<sup>o</sup> 28 North, in Range N.<sup>o</sup> 3 East of the 2.<sup>d</sup> Principal Meridian in the State of Indiana.

And I do further certify, that the foregoing are the true and original Field Notes of the said survey and subdivision, executed as aforesaid. Certified this 15.<sup>th</sup> day of February 1834
